Biggest Achievements of 2021

1 We launched our Leadership Circle to work with the industry's largest companies more closely

2 We launched our APAC Industry Report to deliver incredible insight to our network.

“2021 for the majority was a challenging year for both ourselves and the majority of our business network. Limited revenue possibilities, from covid based restrictions, resulted in us pivoting more towards digital and establishing more focused and regular networking groups. We reduced our number of large events and focused on core events only, putting our time and resource into new projects such as our Leadership Circle, APAC Report and Networking Groups. Coming out of the pandemic we are incredibly excited to get back to live events, travel and moving from digital services to hybrid services for our partners and wider network. The future is bright, very bright.”

Ross Campbell, CEO, FIT Summit
