**“Biohacking:** To understand our individual uniqueness through identifying our genetic structure which separate one from another. To then assess biochemically and physiologically how we perform, and monitor that over time. Adjusting and assessing regularly, so we gain through longitudinal data an understanding of how we perform in a world of stressors.”

# AJT's Venture Into Biohacking

# Basic Premise of Biohacking

The best way to learn the  
normal is to study the  
disordered.

# Genetics vs. Environment

Lack of resilience increases  
the risk of stress-related  
mental disorders.

$$n=1$$

The single most important equation in healthcare
